EDUCATION

GLA University , Mathura	2023 – 2027
Bachelor of Technology in Computer Science & Engineering (AIML & IoT)	CGPA: 7.90/10.00
St. Francis Inter College , Hathras	2022 – 2023
Intermediate (Class XII)	Percentage: 73.2%
St. Francis Inter College , Hathras	2020 – 2021
High School (Class X)	Percentage: 91%

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript,
Machine Learning & AI: Deep Learning, TensorFlow, Keras, OpenCV, Computer Vision
Web Development: React.js, Node.js, Express.js, Flask, REST APIs, HTML, CSS, EJS
Databases & Tools: MongoDB, SQL, Git, GitHub, AWS, VS Code
Soft Skills: Problem Solving, Team Collaboration, Communication

PROJECTS

Project 1: AI-Powered Smart Home Security System | *Python, Flask, OpenCV, React.js, MongoDB, Twilio API*

[GitHub Repository](#)

- Built AI-based security system using computer vision and facial recognition for real-time monitoring
- Implemented motion detection, person identification, and automated SMS alerts via Twilio API
- Developed React dashboard for live monitoring, face management, and video storage
- Enabled known/unknown user filtering with event-based recording

Project 2: Deepfake Video Detection System | *Python, Flask, TensorFlow, Keras, OpenCV, InceptionV3*

[GitHub Repository](#)

- Developed deep learning system to detect deepfake videos using CNN-based features
- Used InceptionV3 for frame-level feature extraction and classification
- Built Flask interface for video upload and confidence-based prediction
- Achieved efficient local processing without cloud dependency

Project 3: E-Commerce Web Application | *Node.js, Express.js, MongoDB, EJS, JavaScript*

[GitHub Repository](#)

- Developed full-stack e-commerce platform with secure authentication
- Implemented product management, cart, wallet, and inventory features
- Designed dynamic checkout with bargaining/negotiation system
- Built scalable backend using Express.js and MongoDB

EXPERIENCE

Experience 1: Machine Learning Trainee | *Coding Blocks*

June 2024 – July 2024

[View Certificate](#)

- Completed a 52-day intensive training program on Machine Learning and Deep Learning
- Gained hands-on experience with model training and evaluation
- Learned supervised learning, neural networks, and deployment basics

Experience 2: Data Analyst Trainee (Micro Experience) | *SkillCred*

July 2024

[View Certificate](#)

- Trained in data cleaning, preprocessing, and exploratory data analysis (EDA)
- Practiced analytical problem-solving using real-world datasets and case studies
